

This software is governed by the terms and conditions of an agreement between UNC Charlotte and Mathworks. Faculty/Staff and students are permitted to download and use the programs on their personally owned computers, on campus, off campus, and via remote access. Acceptable use includes performing software administration, teaching, and noncommercial, academic research.

Installation Instructions for MatLab:

System Requirements

Note: The typical MatLab installation requires 3-4 GB of disk space.

Note: It will take about 1.5 hours to download the software depending on your internet speed

1. Go to <http://www.mathworks.com>
 - a. Click on **Log In** in the upper right corner and select **Create Account**
 - i. Enter your UNC Charlotte Email address (with the @uncc.edu domain)
 - ii. Country/Region
 - iii. Select **Academic use (including campus/site license use)**
 - iv. Are you at least 13 years or older: Yes
 - b. Click **Create** button
2. Log into your UNC Charlotte email account and open the verification email from MathWorks and do the following:
 - a. Click on the **Verify your email** button
 - b. In the MathWorks Account window that appears, provide the information requested for the section above the **Associate Your Account to a License**, then click the **Create** button
 - c. The MathWorks Account window will show the message **Your profile was created** message, and you are now logged into the MathWorks website
3. On the MathWorks web page, if you are not already logged in, click the **Log in** link in the upper right hand corner using the account credentials you just created above.
4. Click on your name in the upper right hand corner and select **My Account**
5. In the **My Licenses** section, under the heading **Associate with a License**, click **Associate License**
6. In the new tab or windows that opens, do the following:
 - a. Copy/Paste or type in the following license number:
83832-17475-45722-37847-37559 into the box
 - b. Click **Associate License** to the right of the code you just entered into the box

7. You will then see a **Success Message** and be provided with a License number
 - a. Write down the License number in case you need it for the future
8. Click **Download Your Products Now** link
9. Click **Download** under the heading **Licensed Products and Updates**
10. Click the **version you want to download**
11. Click on the corresponding operating system that you are currently using

For Apple OS Installations:

1. Go to the Downloads folder and open the MATLAB folder
